New Expanded

SHOCK TEST CAPABILITIES

Now Available at Dayton T. Brown

Large, bulky specimens, measuring up to 36" square without height limitation, may now be shock tested at Dayton T. Brown, Inc. Using a wide variety of accelerations, pulse durations and wave forms, packages up to 2000 lbs. are reliably tested in a fraction of the time previously required.

Performance specifications of Dayton T. Brown's new MRL Model 3636 IMPAC Shock Testing System for a 2000 lb. specimen include:

- *1000g peak acceleration*
- *1 ms min. pulse duration*
- *23 fps max. velocity change-free fall*
- *Universal programming*
- *Square wave, sawtooth or ½ sine waveforms*

A full range of prototype, production, reliability and quality assurance testing services for both military and commercial requirements are available from our laboratories. Write now for full information.

environmental test chambers?

here's the most complete line anywhere...

Looking for the environmental chamber that will match your requirements exactly—at a down-to-earth price?

The most complete line of Temperature and Temperature-Humidity chambers for either component testing or systems testing is completely cataloged and priced for your convenience. With off-the-shelf delivery of high-quality standard products, Associated should definitely be your first choice for your next environmental test chamber.

The new Associated catalog represents several million hours of engineering experience in the environmental field—provides detailed data to help you select, specify and use the chamber you need. Get your copy today—simply write or call.

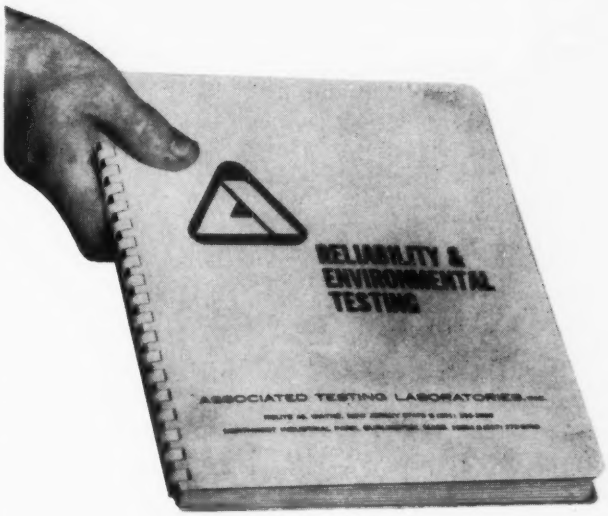
Vibrations and Shock International Standards, C. A. Gouecke, 1967 Vol. 10, No. 2, P. 47

Before you order your next test program



read this free book

Whether you require reliability demonstration or dynamics testing... space simulation or high-volume components testing... it will pay you to investigate the comprehensive range of facilities and capabilities available to you at Associated Testing Laboratories.

Over a million man hours of test engineering experience, unparalleled capacity and support instrumentation, and 24-hours-a-day, seven days a week operation enable Associated to carry out your most demanding test programs accurately, economically and on schedule.

Send today for Associated's free book on reliability and environmental testing. Chances are it can show you how to solve your testing problems once and for all.

Accoustics, Shock and Vibration Bibliography, E. J. Lunney, 1966 Vol. 9, No. 3, P. 32

Environmental Technology—How Are We Doing?, D. C. Kennard, Jr., 1967 Vol. 10, No. 3, P. 12

TEST PROGRAMS

Environmental Test Program, H. J. Sheetz, 1965 Vol. 8, No. 4, P. 26

THERMAL TEST FACILITIES

The Wave Superheater—An Advanced Aerothermal Test Facility, J. E. Carpenter, 1967 Vol. 10, No. 4, P. 32

UNDERSEA

Environmental Test Equipment for Undersea Technology, T. J. Cartin, 1967 Vol. 10, P. 30, No. 1

VACUUM

Application of Selective Pumping Techniques to Upgrade Vacuum Chambers, R. A. Wolf, 1966 Vol. 9, No. 5, P. 12

Diffusion Pumps, S. G. Burnett and R. Hablanian, 1964 Vol. 7, No. 3, P. 7

Finding Leakage by Differential Pressure, E. Skolnick, 1964 Vol. 7, No. 2, P. 35

General Trends in Vacuum Simulation, J. H. Rothenberg, 1967 Vol. 10, No. 3, P. 32

Introduction—Space Vacuum Environments, R. Yaeger, 1967 Vol. 10, No. 3, P. 11

Lubrication in Vacuum, W. C. Young, 1964 Vol. 7, No. 1, P. 15

Measuring Pressure Loss Rates for the Gemini Radar, T. L. Pondek, 1965, Vol. 8, No. 2, P. 30

Remote Measurements of Pressures in Vacuum Systems, G. M. Niemeyer, 1967 Vol. 10, No. 3, P. 16

Selection and Application of High Vacuum Pumping Systems, W. W. Walker, 1967 Vol. 10, No. 3, P. 28

Sputtering, R. P. Stein, 1964 Vol. 7, No. 6, P. 34

Theory and Practice of RF Sputtering, P. D. Davidse, 1966 Vol. 9, No. 6, P. 28

Vacuum Instrumentation, J. D. Anderson, Jr., 1967 Vol. 10, No. 3, P. 19

Vacuum Simulation by Ion Pumps and Cryo Pumping, R. Zaphiropoulos, 1964 Vol. 7, No. 2, P. 23

VIBRATION

Accurate Determination of Grms Through Spectrum Analysis, A. J. Visek, 1965 Vol. 8, No. 6, P. 20

Air Bearings for Electrodynamic Vibrators, Editorial Abstract, 1965 Vol. 8, No. 1, P. 37

Attenuation of Noise and Ground Vibration from Railways, P. Grootenhuis, 1967 Vol. 10, No. 2, P. 14

An Automatic, Adaptive, Servo-control for Stochastic Processes (Part I), D. F. Hillyer, Jr., 1966 Vol. 9, No. 1, P. 30

An Automatic, Adaptive, Servo-control for Stochastic Processes (Part II), D. F. Hillyer, Jr., 1966 Vol. 9, No. 2, P. 13

Automatic Random Equalization Control, A. G. Ratz, 1966 Vol. 9, No. 2, P. 26

Centralized Vibration Control, P. P. Plumb, 1965 Vol. 8, No. 5, P. 12

A Continuous Sweep Time Delay, P. Yu, 1967 Vol. 10, No. 5, P. 27

The Design of Mechanical Force Generators, R. A. Johnson and M. Sevik, 1964 Vol. 7, No. 3, P. 3

The Effects of Vibration on Accuracy of a Positioning Task, J. P. Salter, 1966 Vol. 9, No. 4, P. 18

Exciter-Specimen Interface Coupling, O. J. Zamparo, 1968 Vol. 11, No. 2, P. 25

Factors Affecting Precision Parallel Spectrum Analysis, A. G. Ratz, 1964 Vol. 7, No. 4, P. 14

Finding Fundamental Content of Distorted Waves, W. F. Cox, 1964 Vol. 7, No. 7, P. 34

Force-Controlled Vibration Tests, J. V. Otts, 1965 Vol. 8, No. 5, P. 31

A 400,000 Force—Pound, Eight-Exciter Electrohydraulic Vibration System for Space Vehicle Testing, D. R. Reese, 1968 Vol. 11, No. 4, P. 23

Low-Cost Vibration Fixture System, D. M. Rheuble, 1964 Vol. 7, No. 2, P. 26

A Method of Increasing Vibration Exciter Capability, C. A. Pippin, 1965 Vol. 8, No. 4, P. 30

Performance Considerations for Automatic-Ranging Acceleration-Monitoring Equipment, T. Usher, Jr., 1965 Vol. 8, No. 2, P. 42

A Power Spectral Density Computer Program for the Vibration Laboratory, C. P. Chapman, 1966 Vol. 9, No. 3, P. 25

Practical Interpretations of Unusual Characteristics in Reduced Vibration Data, A. G. Piersol Vol. 10, (1967) P. 17, No. 1

Precautions for Vibration Test Planning and Monitoring, R. M. Mains, 1964 Vol. 7, No. 5, P. 28

Programming of the "G" Level on a Vibration Exciter, C. A. Pippin, 1965 Vol. 8, No. 5, P. 26

A Progress Report on Force Controlled Vibration Testing, C. E. Nuckolls and J. V. Otts, 1965 Vol. 8, No. 6, P. 24

Scanning Techniques for Random Noise Testing, C. P. Chapman, 1968 Vol. 11, No. 1, P. 27

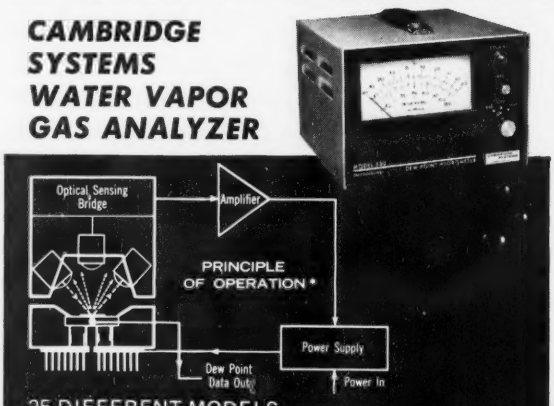
A Simple Method for Varying the Lateral Natural Frequency of Uniform Beams, R. B. Kaplan, 1967 Vol. 10, No. 5, P. 17

Universal Test Fixtures for the Environmental Lab, J. S. Kowalewski, 1966 Vol. 9, No. 4, P. 22

A Vibration Exciter Having Generalized Mobility Characteristics, J. P. Salter, 1966 Vol. 9, No. 4, P. 18

be exact measure Dew Point...

CAMBRIDGE SYSTEMS WATER VAPOR GAS ANALYZER



25 DIFFERENT MODELS
Lowest In Cost To Highest In Accuracy
From −100°F (1 PPM) to +400°F Dew Point

- Furnace Atmosphere Control
- Astronaut Flight Units
- Calibration Standards
- Tactical Weather Stations

*Patented
